**RETURN OF MR. SHEDD**—Harry L. Shedd, who has been spending the summer on the coast, will return to Phoenix September 2 and resume business at 401 Goodrich building.

**TO ELECT OFFICERS**—All members of Pythias are urged to be present at the regular meeting on Friday evening, upon which occasion the semi-annual election of officers will be held and much other important business transacted.

**THEY BUMPED**—Uncertainty on the part of both drivers as to which way the other was going to turn led to a collision between a motorcycle and a buggy at First avenue and Washington street last evening. Two boys riding on the motorcycle were thrown off into the street, but were not hurt.

**INJURED BOY IMPROVING**—Thomas Contreras, who was hurt about the back when a street car demolished one of the Donofrio wagons Saturday afternoon, was considerably improved yesterday. Further examination yesterday disclosed the fact that his injuries were not in any way serious.

**BIRTH OF A DAUGHTER**—Born August 25, 1915, at Atholene, Cal., to Mrs. Hael (Chandler) Voorhees, a ten-pound daughter. Mother and child doing well, and the father carries the smile that won't come off. Mrs. Voorhees is a sister of Mrs. Harry L. Shedd, of this city, who is visiting her at this time.

**THE EVENING STAR**—The exceptional brilliance of the evening star as it hung low in the eastern sky early last evening, caused many ranchers to believe that an illuminant airship was hovering over that section of the country and was about to pay Phoenix a visit. Some of the ranchers refuse to believe that it was not an aeroplane.

**SOME WIND**—For five minutes last evening Phoenix was visited by a wind and sand storm that made things interesting, though so far as known no particular damage was done. Street signs were threatened and trees rid themselves of superfluous branches. One big tree on East Adams street, a few feet from the front of the Republican office, fell with a crash and lay across the street blocking that thoroughfare. An instant later an automobile with three or four persons dashed into the branches of the tree with a crash, but fortunately escaped without being wrecked. Night Street Foreman Jasper Dobbs quickly had his men on the scene and cleared away the debris before further damage resulted.

## MILLENNIUM SUBJECT OF INTERESTING DISCOURSE

An audience that filled every seat at the Y. M. C. A. stadium heard the address of Rev. Claude C. Jones of the Christian church on "The Millennium and Heaven" at the union service last evening.

After interpreting the description of the second coming of Christ as contained in Revelations, the speaker took up the difficult subject of the millennium and expounded it in a way that held the close attention of the entire audience. He outlined conditions on the earth preceding and during the millennium, or thousand year period, and closed with a vivid interpretation of hell and heaven as pictured by John.

"There will be two resurrections," declared Rev. Jones. "The first will be of those who have suffered martyrdom for Christ, and they will reign with Him a thousand years. At the end of that time the devil will again be loosed and will lead many astray, and shortly after will come the destruction of the world. I do not insist that you take these descriptions literally, but I do ask that you study them carefully, and prepare for that time which is surely coming." A choir from the First Presbyterian church furnished the music.

## AMERICAN OFFICIALS

(Continued from Page One)

It is taken for granted that he brought back a fund of interesting information for Secretary Lansing, whom he will meet tomorrow. He reports there is dissension both between Carranza and Villa adherents.

### Should Pull Seives Together

MADRID, Aug. 29.—"Canot the Mexicans even pull themselves up on the brink of the abyss?" asks El Imparcial today in its leading editorial, which is headed "Toward Intervention." The situation in the distressed republic is given a very frank review. "As Spaniards," El Imparcial says, "the Mexican situation ought to occupy us quite as much as the vast struggle now going on in Europe. The Spanish colony in that republic is most numerous. Common interests, friendly ties oblige us to turn our eyes toward Mexico, and yet this country which undoubtedly thousands of our compatriots, especially in our northern provinces, are giving to the situation in Mexico, finds no reflex in the official conduct of Spain."

The Spanish journal reviews the calling by the United States government of a conference of Latin American representatives to take cognizance of the state of anarchy in the neighboring republic with frank scepticism of its disinterestedness.

"In its final analysis," continues El Imparcial, "all of this is in more or less open terms simply means the certain intervention which the United States have laboriously and cunningly gone about preparing. The policy of the United States has for many years consisted in dividing the forces of the various Mexican parties and factions so as to render the establishment of any order impossible."

"It is true, however, that there is not too much reason for insisting upon this shady aspect of the Mexican civil wars. For after all, the Mexicans themselves have been in no especial need of interested, foreign suggestion to exhaust themselves in sterile and personal strife."

"We may admit that in spite of everything that has happened there, and though Mexican soil has been wet with blood, Spanish blood should like to see the shame of intervention avoided in some definite way. If only the Mexicans could realize the danger in which their very independence is placed, if this civil war could cease and the struggle for power in the streets of the country could give way to a period of peace and rebuilding, the riches of Mexico would require very few years to rise again in the midst of all the ruin."

## PLAN EPOCH-MAKING

(Continued from Page One)

structed, known as "sea-going" submarines. The boats are to be stationed at Honolulu as a new division, which will bring the Hawaiian submarine defense up to two divisions. The K boats are approximately 160 feet long over all, 17 feet in the beam and of 500 tons displacement. The boats are capable of making 10 knots in the water, and after hour, day and night out. They are equipped with the Diesel oil-burning engines, for use in surface cruising. These engines eat up 25 gallons of fuel every hour. It is figured that each vessel will carry over 4,000 gallons of fuel.

The K boats of the Atlantic fleet recently made a long run without assistance from Key West to New York. Officially the K submarines are given a cruising radius of 5,000 miles, which means that although they have heretofore been restricted to coast defense duty, should the need arise they could traverse this distance without replenishing fuel. But it has become known recently that this class of craft is capable of even greater radius.

### GOLD FROM BRITAIN

## INSPECTION TRIP TO ARIZONA MINE

For the purpose of inspecting the proposed gold mine in the Tom Reed Goldfield district near Oatman, Arizona, a committee of the San Francisco Stock Exchange left San Francisco last night. Vice President Frank Jewett and A. S. Wohlberg will confer with a number of the directors of the larger properties in Los Angeles on Monday and on Tuesday will be met at Needles by a committee from Oatman.

Thence they will travel by automobile to Oatman, where they will remain several days. It is expected that some of the properties of the district will shortly be listed on the San Francisco Stock Exchange.

It has been reported that the Hayden-Stone interests in New York had recently paid \$250,000 for a quarter interest in United Eastern Mines company, one of the principal properties of which was the Tom Reed mine in Los Angeles last February for about five cents per share.

## Women in the News

NEW YORK.—To prove the fallacy of the claim that woman's place is in the home, and to emphasize woman's importance in the everyday life of the modern city, the suffragists of New York have planned a unique test. It is a huge satire on "woman in the home," and, if carried out, will place the women of New York in their proper perspective for one day. On the appointed day, all New York women and children would stay in the home. It would be virtually a strike of working women, to demonstrate for the first time in history their sphere of influence and usefulness in every phase of everyday life. While the plan is seriously considered by advocates of the suffragist cause, and it has gone so far as to set the day at the latter end of September, it is not believed that sufficient unity of action could be secured under the present organizations of women. To be effective, the "strike" must be complete.

ATLANTA.—The United Daughters of the Confederacy plan to establish a unique monument to the lost cause of the Confederacy. It will be an entire mountain of granite, beautified and inscribed, standing like the Pyramids of old. The Atlanta chapter has secured the services of Gustav Borglum, the noted sculptor, to devise the plan for this giant monument. Stone Mountain has been offered to the Daughters by Mr. Samuel Venable, and it is there the notable memorial to the brave men of the South will be dedicated.

KANSAS CITY.—The women of Kansas are allowed a latitude under the laws of the Sunflower state that their sisters do not enjoy in other sections of the United States. Here are some of the things she may legally do. Take her maiden name after her husband dies, without legal process. Keep her own car, even if she is married; can persuade her husband to take her name and give up his family name if she does not like it. Or she can retain her maiden name and hubby retain his. She can wear men's clothing without any restriction, except that she must not pose as a man. She can vote at any election, and can hold any office in the state and run for congress.

MINNEAPOLIS.—Miss Beesle Bennett, one of the art jury which is selecting the art works for the big state fair next week, is one of the most prominent American connoisseurs of art. She is in charge of the textiles and craft work at the American Art Institute of Chicago, and is recognized as an authority on textiles. Each year she has installed the industrial art exhibition at the Chicago Institute, which is the largest exhibition of its kind in the country.

LONDON.—Hon. Ivy Gordon-Lennox, one of the prettiest girls in all England, is to wed the young Marquis of Titchfield, the son and heir of the Duke of Portland. She is six years older than the marquis, who is only 22. She possesses much of the finest features, as well as the cleverness and fascination of her famous aunt, the Countess of Warwick. Lady Gordon-Lennox is the niece of the Duke of Richmond and Gordon. Her father, the second son of the former Duke, served on the staff of General French.

NEW YORK.—Friends of Miss Gladys Ravenscroft, the English golfer, have news from Liverpool of her engagement to Temple Dobell of Birkenhead. Miss Ravenscroft has won all of the golf events open to ladies in her own country, and two years ago came to America and annexed many honors.

SAN FRANCISCO.—If the plan to nationalize Poland is carried out, it is possible that an American girl may become the queen of Poland. She is Elizabeth Sperry of Stockton, Calif., who married Prince Andre Poniatowski, a Polish nobleman. Her husband has been among the first mentioned in European capitals as a possible selection of the Russian czar. The plan has been temporarily upset by the Russian loss of Poland, and, of course, the lady might herself be consigned before she would consent to be queen of a war-swept land.

SLAPPED EACH OTHER—Antonio Bostick, employed at the Second Street Noodle restaurant, and Josephine Sierras, who wants to be, were in the establishment early last evening. The Bostick woman reported the affair to the police and the Sierras woman was arrested while hurrying down South Third street. Then the police went over and got the Bostick woman and locked her up. Both women are charged with disorderly conduct.

## FORGOTTEN DEPOSITS AMOUNT TO THOUSANDS

ST. LOUIS, Aug. 29.—Thousands of dollars in real money, deposited by forgotten persons, careless persons or persons who since have died, is waiting for the owners or their heirs at the Boatmen's bank, according to an announcement made recently.

The publication of the uncalled deposits is a revelation to persons accustomed to count their pennies. For instance, Joseph O'Day, whose address is not known, deposited a cashier's check for \$1100 in 1910 and seems to have forgotten it. G. H. Suver, "Heldkamp's Hotel," St. Louis, went Mr. O'Day several thousand better. In August of 1887 he deposited \$4119.18 and never called for it. Mr. X, living at X, also deposited \$500 he did not want to carry about, and his memory, too, seems to have been about as definite as his name and address.

The list includes 90 accounts that have been overlooked. It was published in accordance with a banking law requirement.

## CHINESE GOODS FOR

(Continued from Page One)

ing the finer grades of cloth now brought from England, the United States, France and other European countries.

China imported about \$105,000,000 worth of manufactured cotton in 1912. Of this amount about \$67,000,000 worth was coarse fabrics and yards of a sort which Chinese factories could produce. The same year it is estimated China raised slightly more than 200,000 tons of native cotton, only a small percentage of the amount required by its own factories.

Cotton is growing in eight of the southwestern provinces and in the Yangtze province, but the cultivation is so clumsy that the yield per acre is small. Definite figures are not available, but the highest yield per acre is said to have been 176 pounds of cleaned cotton. Poor seed and bad cultivation are responsible for the short crop, as much of the land is said to be admirably adapted to cotton growing.

It is estimated that the amount of land in China available for cotton culture is 27,000,000 acres, with a possible increase of 2,000,000 acres through irrigation.

However, the successful extension of cotton manufacturing in China would necessitate a complete reorganization of its economic system. About half of the Central Government's income is derived from the import duty on manufactured cotton. With the abolition of opium manufacture, the government endeavored to persuade poppy farmers to turn their attention to cotton. This move was not as successful as officials desired, but the minister of agriculture is endeavoring, through experimental farms, to popularize modern plows and make cotton more profitable.

Since the presentation of the Japanese demands upon China, popular defense fund of about \$25,000,000 gold has been subscribed. It is proposed to establish a bank with part of this fund which shall lend money to Chinese cotton mills and other industries which will make China more independent of other nations and keep its money at home.

Dr. Wu Ting Fang and many other prominent Chinese are lending their support to this new industrial movement. The Chinese Honorary Commission, which has just completed a tour of the United States, is interested especially in inducing foreign capital to come to China, and through its observation of American methods hopes to be able to direct Chinese industries into more progressive channels.
